Perum Duta Kranji Jalan Cendrawasih VI Blok B.158, Kota Bekasi, Jawa Barat, 17134

Backend Engineer with 4+ years of experience in designing robust system architectures that are scalable, secure, and optimized for performance. I focus on building backend services and databases that integrate smoothly with web and mobile platforms. I thrive in cross-functional teams, working closely with tech leads, IT managers, PMs, UI/UX designers, and QA engineers to deliver high-impact solutions. Passionate about clean architecture and continuous improvement, I also mentor junior developers to grow in backend engineering.

Education Level

STMIK Bani Saleh - Kota Bekasi, Indonesia <i>Bachelor Information Technologies, 3.48/4.00</i> Making research on the design of inventory applications for the final project.	Aug 2017 - Aug 2021
--	---------------------

Work Experiences

PT. Eratani Teknologi Nusantara - DKI Jakarta, Indonesia <i>Backend Engineer II</i> - Designed and implemented scalable backend architectures (including Hexagonal & Orchestration patterns), improving system performance by 20%. - Conducted comprehensive code reviews and merge requests, mentoring junior developers and ensuring code quality and stability. - Analyzed feature impacts and performed technical breakdowns to support smooth and accurate development during feature changes. - Successfully refactored and modernized legacy code to become maintainable, by introducing SOLID principles, writing unit tests, and improving modularity. - Collaborated cross-functionally with frontend, QA, PMs, and UI/UX teams to deliver systems on time and with minimal friction. - Reduced bug potential through structured error handling and defensive coding strategies. - Developed internal notification systems to alert teams on critical production errors, enabling faster incident response.	Jun 2023 - Present
GoEscape Academy - Indonesia <i>Development Mentor</i> - Developed effective teaching strategies to accelerate mentee comprehension of complex topics such as microservices, database design, and architecture patterns. - Emphasized industry best practices including clean code principles, SOLID, and test-driven development, while nurturing a growth mindset. - Conducted personalized 1-on-1 mentoring sessions, ensuring tailored learning paths and continuous progress tracking for each mentee.	Apr 2025 - Present
PT. Astra International Tbk. - DKI Jakarta, Indonesia <i>Freelance Backend Engineer</i> Initiated and developed a new backend system from scratch using Rust, laying a strong foundation for future scalability and reliability.	Nov 2024 - Jan 2025
Afteroffice Academy - Indonesia <i>Development Mentor</i> - Mentored 20+ mentees per batch, guiding them in backend development using Go and preparing them for professional engineering roles. - Delivered practical, project-based training to over 100+ mentees, effectively bridging the gap between theory and real-world application. - Collaborated with fellow mentors to design and review scalable system architectures, fostering critical thinking and teamwork among mentees. - Developed effective teaching strategies to accelerate mentee comprehension of complex topics such as microservices, database design, and architecture patterns. - Emphasized industry best practices including clean code principles, SOLID, and test-driven development, while nurturing a growth mindset. - Conducted personalized 1-on-1 mentoring sessions, ensuring tailored learning paths and continuous progress tracking for each mentee.	May 2024 - Mar 2025
PT. Sentra Inovasi Prima (Yipy) - DKI Jakarta, Indonesia <i>Backend Engineer</i> - Developed and refactored RESTful APIs using Go, applying the MVC pattern for clear separation of concerns and maintainability. - Designed and implemented scalable backend architecture to support application growth and performance.	Aug 2022 - Feb 2024

- Led the migration from a monolithic system to a microservices-based architecture, improving system flexibility and deployment efficiency.
- Managed AWS infrastructure, including EC2, RDS, and S3, ensuring reliable and secure operations.
- Oversaw database design and optimization, ensuring efficient data access and integrity.
- Performed in-depth troubleshooting and issue resolution to maintain system stability.
- Collaborated closely with frontend developers to ensure seamless and consistent API integration.
- Applied Agile methodologies (Scrum) to manage sprints, tasks, and delivery timelines effectively.

Personal Project - Indonesia Jan 2019 - Apr 2024

Academic Consultant Information Technology

- Advised students in formulating impactful and researchable thesis titles, and assisted in preparing strong proposal documents.
- Guided students through the thesis writing process, emphasizing clarity, structure, and relevance to technological development.
- Offered technical consulting in backend development for both web and Android platforms, helping students translate ideas into functional systems.

PT. Teknologi Inovasi Mandiri - Tangerang, Indonesia Jun 2022 - Oct 2022

Backend Developer

- Built and maintained RESTful APIs using Spring Boot for the E-SID application under the Ministry of Transportation, enabling efficient data access and system interoperability.
- Developed and supported internal systems at Bank BJB, including automation for end-of-day, end-of-month, and end-of-year processes.
- Led the successful database migration from MySQL to PostgreSQL, improving data performance, consistency, and scalability.

PT. Fliptech Lentera Inspirasi Pertiwi (Flip ID) - DKI Jakarta, Indonesia Jun 2021 - Oct 2021

Junior Backend Developer

- Developed RESTful API endpoints using Node.js and Express to support mobile application functionality.Implemented secure authentication mechanisms using Bearer Tokens and JWT for user authorization. Conducted manual API testing and validation using Postman to ensure accuracy and reliability of backend responses.

PT. Bank Tabungan Negara (Persero) Tbk. - DKI Jakarta, Indonesia Aug 2020 - Mar 2021

Web Developer

- Developed internal attendance web applications using CodeIgniter (PHP) for backend and React.js for frontend, integrating UI/UX designs into functional interfaces.
- Conducted regular maintenance and performance checks on internal web apps to ensure optimal functionality and uptime.
- Monitored and updated system logs using Unix/Linux environments to ensure system health and early detection of issues.
